

Yoana Churkina

UI/UX Designer | Product Designer

yonichurkina@gmail.com | +359 89 7397 297 | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

UI/UX and Product Designer with hands-on experience designing digital products across B2B SaaS, AI-supported platforms, and technical applications. Strong focus on Figma, interaction design, prototyping, design systems, and creating clear, consistent user interfaces. Experienced in translating business, user, and technical requirements into functional design solutions and collaborating closely with developers and stakeholders to ensure technical feasibility. Background in UX research and usability testing, allowing me to combine user needs with practical product and interface decisions. Master's in Data-Driven Design with a focus on data-informed product experiences.

EXPERIENCE

Shift Leader - Normal | Sept 2024 - June 2026

- Coordinated daily operations, task prioritisation, and workflow execution in a fast-paced environment.
- Resolved operational issues and supported onboarding and knowledge transfer through structured processes and team communication.

UX/UI Designer (Intern) - MediaCampusNL | Sept 2024 - July 2025

- Worked on an AI-supported platform for Dutch media start-ups, helping founders explore, validate, and develop new business ideas.
- Led the UX process from problem framing and research through personas, task flows, prototyping, and evaluation.
- Designed and iteratively refined product experiences based on user research and usability testing.
- Conducted user interviews, discovery research, and usability testing to understand user behaviour, expectations, and interaction with AI recommendations.
- Translated research findings into product and interface improvements, including incognito mode and explicit opt-out controls.
- Iterated on the product through usability testing, increasing task success to **80–95%** and SUS score from **67.5** to **83.75**.

UX/UI Designer - Simptel | Feb 2024 - July 2024

- Designed a low-code workflow builder that enabled business users to configure identity and authentication flows without developer involvement.

- Translated business, user, and technical requirements into functional UI and workflow solutions for registration, authentication, account recovery, and MFA.
- Created wireframes, high-fidelity prototypes, and design documentation in Figma, iterating designs based on user feedback and usability testing.
- Collaborated closely with developers and stakeholders to validate technical feasibility and refine complex B2B SaaS workflows.
- Simplified authentication configuration processes, reducing implementation time from approximately one week to one–two days.
- Analysed complex identity and authentication processes and translated them into clearer, more accessible user experiences

UX/UI Designer (Intern) — Bosch Security & Systems | Aug 2022 – Jan 2023

- Conducted user research and market analysis for Bosch's **Future of Conference** project, exploring how non-technical users could manage complex audio/video meeting configurations.
- Identified user needs and pain points around **manual JSON-based configuration**, translating research findings into requirements for a more accessible visual solution.
- Designed and validated a visual interface that enabled users to configure meeting setups without directly working with JSON.
- Collaborated with designers, developers, and technical stakeholders to translate user needs into a feasible digital solution.
- Designed and implemented the interface using **React and CSS**; the solution is now deployed by municipalities and government organisations worldwide.

EDUCATION

Master's, Data-Driven Design

Utrecht University of Applied Sciences | 2024–2025

UX research · Data Science · Data-informed design · AI-driven products · Behavioural analysis

Bachelor's, Information Technology & Media Design

Fontys University of Applied Sciences | 2020–2024

UX/UI design · Interaction design · Technology · Digital product development

Minor, Brand Experience & Event Design

Utrecht University of Applied Sciences

SKILLS

- **UI & Product Design:** Figma, FigJam, Prototyping, Interaction Design, Design Systems, UI Design, Component Design, WCAG Accessibility

- **UX:** User Interviews, Usability Testing, Discovery Research, Evaluative Research, Research Synthesis, User Needs Analysis, Journey Mapping, Personas, Task Analysis, Problem Framing
- **Collaboration & Product:** Stakeholder Collaboration, Developer Collaboration, Product Discovery, Requirements Analysis, Data-Informed Design
- **Technical:** HTML, CSS, JavaScript, React, JSON, Python
- **Tools:** Figma, FigJam, Miro, Jira, Azure DevOps, GitHub, Google Analytics
